

FLATYZ

hand-crafted flat candles

2024

Our Candles

The production technology of a flat candle includes the formulation of paraffin mass, temperature control, forming, tooling, and decorating. These techniques are all mastered by dedicated team members at FLATYZ. The product itself, a flat candle with an assembled base is our patented invention. We manufacture a unique product challenging the stereotypes of candle shapes and design. Our talented artisans not only pour each candle by hand but also decorate them using various manual artisanal techniques.

About FLATYZ candles

Inspired by changing the conventional way of candle making, FLATYZ began its story in 2012. Our co-founders launched FLATYZ with the idea to create the world's first-ever flat candle that would serve as a beautiful canvas for hand-painted designs.

All FLATYZ candles are made in Lithuania by the meticulous handwork of our artisans, making each candle authentic and unique. With over 200 designs, our hand-poured and hand-painted candles decorate and illuminate every space, occasion, and ambience.

FLATYZ is proudly the world's most unconventional and beautifully hand-crafted candle today. We thank you for helping us spread the light!

Hand-crafted with love,
The FLATYZ Team

Process..

1/

Before decorating FLATYZ candles are hand-poured, hand-cut and hand-dipped in a special paraffin mass.

2/ For candle decoration we use only particular safe-to-burn paints made in Germany.

3/ Our artisans decorate each candle by hand - so every product is authentic and unique.

4/ Later these pieces of art are carefully packaged by hand, ensuring maximum protection during transportation.

Custom

We are able to produce a custom flat candle using your unique design. Whether it is a special celebration, a company gift, or a promotional item highlighting something important, we would be pleased to evaluate your request.

Tips for Properly Burning a Drip-resistant Candle

- Never leave a burning candle unattended;
- Make sure there are no combustible objects near the burning candle;
- Do not keep the candle in direct sunlight, near heaters or fireplaces as it may cause it to deform and/or change color;
- Do not burn the candle when draft is present i.e. fan, open doors/windows, high traffic area. As all drip-resistant candles, flat candles may drip given such unfavorable conditions;
- In the event that the candle starts to drip - put it out. Let it completely cool off, remove the paraffin that has run down, clean the wicks and relight after moving it to a different location;
- A paraffin stain is easily removed from a hard surface by heating it with a hairdryer OR by placing a cotton napkin on the paraffin stain and ironing over it on a low heat setting;
- Smother the candle to extinguish.
